

Lead to Returning Student Journey

A simple summary of what happens from first lead stage to returning student stage.

1. Lead Journey

A person enters the system as a new lead.

Ops books the placement test.

Student Success records the result and assigned level.

Ops sends the offer and records payment.

After payment, the student moves to Waiting for Round, then Ready to Start, then In Classes.

2. Student Journey

The student attends the class, sessions are completed, and grades and attendance are recorded.

At the end of the level, Mentor Head closes the round.

3. What Happens After the Level Ends?

Case A: If the student already has prepaid credit for the next level, the system moves the student to Waiting for Round.

This means the student is already paid in full for the next step.

Case B: If the student has no remaining prepaid credit, the system moves the student to Renewal Pending.

Ops must then send a new offer and collect the next payment.

4. Returning Student Journey

If status is Waiting for Round, the next action is scheduling and class placement.

If status is Renewal Pending, the next action is offer, payment, then scheduling.

After that, the student returns to Ready to Start and then In Classes again.

5. Simple Flow

New Lead -> Test Booked -> Tested -> Offer Sent -> Payment -> Waiting for Round

-> Ready to Start -> In Classes -> Level Ends -> Renewal Pending or Paid in Full / Waiting for Round
